

PROFESSIONAL SUMMARY

Computer Science and Engineering student and MERN Stack Developer with hands-on experience building responsive React applications and backend services with Node.js, Express.js and MongoDB. Experienced in REST API development, request/response handling, file uploads, database integration, CRUD operations, authentication-related flows, API integration and debugging full-stack applications. Also familiar with MySQL, Cloudinary, Multer/FormData, Tailwind CSS and Bootstrap. Built 10+ academic and personal projects.

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript (ES6+), React.js, Redux, Tailwind CSS, Bootstrap, Responsive Design
Backend	Node.js, Express.js, REST APIs, CRUD Operations, API Integration, Axios, Middleware, MVC-style architecture
Databases	MongoDB, MySQL
Backend Tools & Concepts	Cloudinary, Multer, FormData, JSON, HTTP/REST, async/await, error handling, route/controller development
Development	Git, GitHub, Postman Testing, Thunder Client, Vite, VS Code

PROJECTS

Doctor Appointment & Healthcare Platform — MERN Stack | [Live](#)

- Built a full-stack healthcare platform with React frontend and Node.js/Express backend for patient, doctor and admin workflows.
- Implemented doctor registration/profile management, fees, address data, document/image uploads, doctor availability, slot generation and appointment operations.
- Admin panel supports doctor management, availability control and appointment management; doctor dashboard supports profile, availability and appointment status updates.
- Integrated Cloudinary for image storage and Razorpay for appointment payments; used JWT authentication and MongoDB/Mongoose.

Tomato — Food Delivery Platform | [Live App](#) | [GitHub Repo](#)

- Built a full-stack food ordering application with React/Vite customer frontend, Node.js/Express/MongoDB backend and a separate React admin dashboard.
- Implemented food browsing by category, cart operations, JWT authentication, delivery details, Stripe Checkout, order history and order-status tracking.
- Admin panel enables adding/listing/removing food items with image uploads and managing customer orders with status updates.
- Used MongoDB/Mongoose, JWT, bcryptjs, Multer, Stripe, Axios and React Router across the application.

Home Rental / Hosting Application | [Live App](#) | [GitHub Repo](#)

- Built backend flows for hosts to add, view, edit and delete homes and for users to manage favorite homes.
- Implemented routing, controllers, database operations and relationships between host homes and favorite-home data.
- Handled form data, server-side validation, redirects, middleware and database hooks/pre-delete logic for synchronized records.

To-Do & Mini Social Media Applications — React.js

- Built interactive React applications with component-based architecture, state management and CRUD-style UI flows.
- Implemented task management and social-post interactions to strengthen frontend, state-management and API-integration skills.

EDUCATION

B.Tech — Computer Science and Engineering 2023-2027
Vishveshwarya Group of Institutions
Expected graduation: June 2027 | Average SGPA: 7.5

ADDITIONAL STRENGTHS

Problem solving • Debugging frontend/backend integration • Responsive UI development • API testing • Database-backed application development • Continuous learning
